-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2876

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 5,546,523. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the currently claimed limitations can be found within the patent claims except for the displaying of the list of recent transactions as in claims 7 & 15 and the user inputted memo of claim 8. More specifically, the patent discloses a controller (patent claim 1 line 7 terminal), a display (patent claim 1 line 11) for displaying graphical user interface comprising transaction choices (patent claim 1 line 11 one or more custom transactions based on information), and an input means (patent claim 1 line 15). There is disclosed a pointing device (patent claim 3), a means for selecting a transaction type (patent claim 4 plurality of choices), and a means for selecting an account (patent claim 5 plurality of financial institutions indicates plurality of accounts). There is disclosed a means for selecting if a transaction should be printed (patent claim 10) and a means for predicting transactions types to be displayed (patent claims 7 and

8). The patent does not claim displaying the list of recent transactions. However, this is an old and well known and a common display generated at ATM and other POS or desktop terminals. It would have been obvious to a person of ordinary skill in the art at the time of the invention to display a list of recent transactions on the display of the '523 patent. This would allow a patron of the system to review recent transactions for personal accounting reasons. Likewise, annotating a terminal transaction with a memo is old and well known. It would have been obvious to one of ordinary skill in the art at the time of the invention to allow for annotation of transactions of the system of the '523 patent. This would allow a patron of the system to positively mark a questionable transaction in order to help the patron remember past transactions.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gatto 6,149,055 and 5,859,416 both disclose and claim similar inventions.
